

Curriculum Vitae

Sean Patrick Long

*Associate Professor of Earth Science
School of the Environment, Washington State University*

Updated: October 23, 2024

Research Interests

My research focuses on investigating the structural evolution of contractional and extensional mountain belts, including the Himalaya, the Andes, the North American Cordillera, and the Basin and Range Province. I integrate mapping-based field data with a diverse suite of quantitative datasets, including geochronology, thermochronometry, metamorphic temperatures and pressures, microstructural analyses, regional tectonic reconstructions, and balanced cross sections. Much of my research involves field-based evaluations of the predictions of models for the dynamics of mountain belts.

Contact Information

Office:	1155 Webster Hall	Address:	School of the Environment
Phone:	509-335-8868		Washington State University
Email:	sean.p.long@wsu.edu		PO Box 642812
Website:	www.seanpatricklong.com		Pullman, WA 99164-2812

Education

Ph.D. , Geology	Princeton University , 2010
M.S. , Geology	Idaho State University , 2004
B.S. , Mathematics	The College of Idaho , 2001

Professional Experience

2018-2025	Associate professor (tenured) , School of the Environment, Washington State University
2015-2018	Associate professor (untenured) , School of the Environment, Washington State University
2010-2015	Assistant professor , Nevada Bureau of Mines and Geology, University of Nevada, Reno
2006-2010	Teaching/research assistant , Princeton University
2008 Summer	Intern , Chevron Energy Technology Corporation
2006 Summer	Contract field geologist , New Mexico Bureau of Geology and Mineral Resources
2005-2006	Adjunct instructor/research associate , Idaho State University
2004	Environmental consulting geologist , Glorieta Geoscience, Inc., Santa Fe, New Mexico
2002-2004	Teaching/research assistant , Idaho State University
2002 Spring	Teaching assistant , University of Idaho

C. Ph.D. Dissertation and M.S. Thesis

Long, S.P., 2010, The evolution of eastern Himalayan deformation: geometry and kinematics of the Himalayan fold-thrust belt, eastern and central Bhutan [Ph.D. Dissertation]: Princeton, Princeton University, 475 p., 51 figures, 13 tables, 3 plates.

Advisor: Nadine McQuarrie (Princeton)

Examining committee: Lincoln Hollister (Princeton), Adam Maloof (Princeton), Chris Andronicos (Cornell)

Long, S.P., 2004, Geology of the Henderson Creek quadrangle, Oneida County, Idaho: multiple phases of Tertiary extension and deposition [Master's Thesis]: Pocatello, Idaho State University, 158 p., 31 figures, 3 tables, 2 plates.

Advisors and examining committee: David Rodgers (Idaho State), Paul Link (Idaho State), Susanne Janecke (Utah State)

Grants Awarded: \$2.6 million (\$1.5 million as PI, \$1.1 million as co-I)

2024 – \$468,724 – NSF Petrology and Geochemistry program, EAR-2342159
PI: Johannes Haemmerli (WSU), **co-I: Long** (WSU), co-I: Jeffrey Vervoort (WSU).
Project title: Does deformation lead to misinformation? How much can granitic rocks be deformed before accessory minerals are geochemically disturbed?

2021 – \$284,698 – NSF Tectonics program, EAR-2118117
PI: Long (WSU), PI: Matthew Kohn (Boise State).
Project title: Collaborative Research: How do ultrahigh pressure metamorphic sheets form and exhume? A case study from the Tso Moriri complex, India.

2020 – \$177,094 – NSF Tectonics program, EAR-2022973
PI: Long (WSU), PI: Jeffrey Lee (Colorado School of Mines).
Project Title: Collaborative Research: Calibrating quartz fabric intensity as a

function of strain magnitude: a field-based investigation in the Snake Range core complex, Nevada.

2020 – \$197,832 – NSF Tectonics program, EAR-2015601

PI: Long (WSU), PI: Matthew McKay (Missouri State).

Project title: Collaborative Research: Evaluating the drivers of exhumation during accretionary orogenesis: A field-based investigation in the Salmon River Suture Zone, Idaho.

2017 - \$17,127 – USGS EdMap program, agreement no. G17AC00130

PI: Long (WSU).

Project title: Structural analysis of the McClure Spring syncline, Pancake Range, Nevada: characterizing the style and timing of contractional deformation in the Sevier hinterland.

2016 – \$596,788 – NSF Major Research Instrumentation program, EAR-1626670

PI: Jeffrey Vervoort (WSU), **co-I: Long** (WSU), co-I: John Wolff (WSU), co-I Erin Thornton (WSU), co-I Brian Kennedy (University of Idaho).

Project title: MRI: Acquisition of a laser-ablation, multi-collector ICP-MS for research and training in Earth, Environmental, and Anthropological Sciences.

2015 – \$117,000 – NSF Tectonics program, EAR-1524765

PI: Long (WSU), PI: Kathryn Snell (UC-Boulder - \$141,010), PI: Joshua Bonde (UNLV - \$131,000).

Project title: Collaborative Research: The record of Early Cretaceous growth of the Nevadaplano from syn-orogenic deposits of the Sevier hinterland.

2014 – \$15,068 – Makoil, Inc.

PI: Long (UNR).

Project title: Analysis of the thermal history of the central Grant Range: testing models for development of Railroad Valley petroleum systems.

2013 – \$39,216 – USGS Statemap program, agreement no. G13AC00235

PI: Long (UNR).

Project title: Northern Grant Range mapping project: evaluating structural models for the Grant Canyon and Bacon Flat oil fields.

2013 – \$123,000 – NSF Tectonics program, EAR-1250510.

PI: Long (UNR), PI: Brian Horton (UT-Austin - \$130,500).

Project title: Collaborative Research: Thrust belt response to rapid surface uplift of the Altiplano: A field test of Cordilleran cyclicity in southern Bolivia.

2012 – \$46,000 – Timberline Resources, Corporation

PI: Long (UNR).

Project title: Focused geologic mapping and structural analysis in the southern Eureka mining district: testing structural models of mineralization.

2012 – \$392,960 – NSF Tectonics program, EAR-1220300

PI: Long (UNR), co-I: Stacia Gordon (UNR).

Project title: Did channel flow drive the thermo-mechanical evolution of the eastern Himalaya? A field-based test in northeast Bhutan.

2012 – \$14,317 – University of Nevada, Reno, College of Science

PI: Long (UNR), co-I: Stacia Gordon (UNR).

Project title: Funding for purchase of mineral separation equipment.

2011 – \$61,213 – USGS Statemap program, agreement no. G11AC20244

PI: Long (UNR), co-I: John Muntean (UNR), co-I: Chris Henry (UNR).

Project title: South Eureka mining district mapping project: understanding connections between tectonics, magmatism, and gold deposits.

2010 – \$45,000 - Timberline Resources, Corporation

PI: Long (UNR), co-I: John Muntean (UNR), co-I: Chris Henry (UNR).

Project title: Geologic framework of the southern Eureka mining district.

2009 – \$2,310 – Geological Society of America graduate student research grant

PI: Long (Princeton).

Project title: Convergence partitioning in the eastern Himalaya: the role of the Bhutan fold-thrust belt.

Invited Talks

42. September 5, 2024 – Washington State University, School of the Environment
Geology Seminar Series
Title: *“New approaches for quantifying crustal thickening processes in mountain belts: Examples from the Himalaya and North American Cordillera”*
41. April 3, 2024 – University of Nevada, Las Vegas, Geoscience Department seminar series
“The widening of the West: How much, when, and why?”
40. August 31, 2023 – University of Idaho Department of Geosciences seminar series
“The widening of the West: How much, when, and why?”
39. April 7, 2023 – University of Arizona Department of Geosciences weekly brown-bag geology seminar
“Stretching, flattening, and thermally-inverting the Himalayan orogen in Bhutan”
38. April 6, 2023 – University of Arizona Department of Geosciences colloquium
Title: *“The widening of the West: How much, when, and why?”*

37. December 14, 2021 – American Geophysical Union annual meeting, New Orleans, LA: “Growth and Modification of Continental Crust in Extensional and Compressional Regions” session.
Title: *“Tracking crustal thickness changes accommodated by Cordilleran contraction and Basin and Range extension: Insights from a reconstructed cross section across Nevada and Western Utah”*
36. November 10, 2021 - Idaho State University Department of Geosciences colloquium
Title: *“The widening of the West: How much, when, and why?”*
35. February 25, 2021 - University of Texas, Austin, Jackson School of Geosciences, Petrology, Geochemistry, Structure, & Tectonics talk series
Title: *“The widening of the West: How much, when, and why?”*
34. December 1, 2020 – University of Liverpool, Herdman Society lecture series
Title: *“The widening of the West: How much, when, and why?”*
33. November 17, 2020 – Columbia Basin Geologic Society monthly meeting, Spokane
Title: *“The widening of the West: How much, when, and why?”*
32. November 16, 2020 – San Jose State University Geology Department seminar series
Title: *“The widening of the West: How much, when, and why?”*
31. January 24, 2020 – Texas A&M University, Department of Geology and Geophysics, Weekly Seminar Series
Title: *“The widening of the West: How much, when, and why?”*
30. Sept 25, 2019 – Geological Society of America annual meeting, Phoenix, AZ, “From Oceanic Subduction to Inter-Continental Collision: Examples of Convergent Margin Processes in Non-Collisional and Collisional Settings” session
Title: *“Distributed stretching gradients between major Himalayan shear zones, and their role in mass transfer”*
29. May 10, 2019 – Oregon State University, Department of Geology and Geophysics, Structure, Tectonics, and Geomorphology group meeting
Title: *“Stretching, flattening, and thermally-inverting the Himalayan orogenic belt in Bhutan”*
28. May 9, 2019 – Oregon State University, Department of Geology and Geophysics, Weekly Seminar Series
Title: *“How much, when, and why was the West widened?”*
27. May 6, 2019 – University of Nevada, Reno, Department of Geological Sciences seminar series
Title: *“How much, when, and why was the West widened?”*

26. February 27, 2019 – Northern Arizona University, School of Earth and Sustainability
Title: "*How much, when, and why was the West widened?*"
25. January 7, 2018 – National Association of Geoscience Teachers 5th Biennial Structural Geology and Tectonics Forum: "Tectonics of Western North America: What's New" session
Title: "*New perspectives on the construction and extensional collapse of the Nevadaplano: A summary of recent progress*"
24. November 9, 2017 – Washington State University, School of the Environment Geology Seminar Series
Title: "*Stretching, flattening, and thermally-inverting the Himalayan orogenic belt in Bhutan*"
23. October 25, 2017 – Geological Society of America annual meeting, Seattle, WA: "New Perspectives on Cordilleran Tectonics, Paleogeography, and Metallogeny" session.
Title: "*A summary of recent progress on understanding the structural evolution and paleogeography of the Nevadaplano*"
22. October 21, 2017 - Geological Society of America annual meeting, Seattle, WA: "Challenges in Tectonics 4: Planetary Evolution in Four Dimensions – The New Global Tectonics" session
Title: "*Integration of geometry, kinematics, burial timing, and exhumation timing to understand 4-D thrust belt evolution: an example from the Himalayan orogen in Bhutan*"
21. February 17, 2016 – University of Nevada, Las Vegas, Geoscience Department Seminar Series
Title: "*Creation and synorogenic collapse of a structural culmination in the Nevadaplano: Sevier giveth, gravity taketh away*"
20. January 29, 2016 – Central Washington University, Department of Geological Sciences, Seminar Series
Title: "*Creation and synorogenic collapse of a structural culmination in the Nevadaplano: Sevier giveth, gravity taketh away*"
19. September 14, 2015 – Utah State University, Department of Geology, Distinguished Speaker Series
Title: "*Creation and synorogenic collapse of a structural culmination in the Nevadaplano: Sevier giveth, gravity taketh away*"
18. September 11, 2015 – Washington State University, School of the Environment Geology Seminar Series
Title: "*Creation and synorogenic collapse of a structural culmination in the Nevadaplano: Sevier giveth, gravity taketh away*"

17. May 18, 2015 – Geological Society of Nevada 2015 Symposium: “Regional Geology and Metallogeny of the Great Basin” session
Title: “*Map pattern and style of regional-scale contractional deformation in the Sevier hinterland in eastern Nevada: insights from sub-volcanic paleogeologic maps*”
16. April 2, 2015 - Nevada Petroleum and Geothermal Society monthly meeting, Reno
Title: “*A newly-defined fold province in eastern Nevada: a Valley and Ridge in the Basin and Range*”
15. October 2, 2014 – Bhutan Department of Geology and Mines, Thimpu, Bhutan
Title: “*A summary of the 2012-2014 research of the University of Nevada, Reno group in eastern and central Bhutan*”
14. January 15, 2014 – University of Texas, Austin, Jackson School of Geosciences, Petrology, Geochemistry, Structure, & Tectonics talk series
Title: “*A record of shortening rates in the Himalayan thrust belt in Bhutan: integrating geochronology, thermochronology, deformation geometry, and kinematics*”
13. December 6, 2013 – University of Arizona Department of Geosciences weekly Cordilleran seminar
Title: “*What can a mid-Tertiary unconformity tell us about deformation and erosion in the Nevadaplano?*”
12. December 5, 2013 – University of Arizona Department of Geosciences colloquium
Title: “*A record of shortening rates in the Himalayan thrust belt in Bhutan: integrating geochronology, thermochronology, deformation geometry, and kinematics*”
11. November 21, 2013 – University of California, Berkeley, Department of Earth and Planetary Science department seminar
Title: “*A record of shortening rates in the Himalayan thrust belt in Bhutan: integrating geochronology, thermochronology, deformation geometry, and kinematics*”
10. November 20, 2013 – University of California, Davis, Department of Earth and Planetary Science seminar series
Title: “*A record of shortening rates in the Himalayan thrust belt in Bhutan: integrating geochronology, thermochronology, deformation geometry, and kinematics*”
9. May 2, 2013 - Nevada Petroleum and Geothermal Society monthly meeting, Reno, NV
Title: “*What can the mid-Tertiary unconformity tell us about deformation and erosion in the Nevadaplano?*”

8. November 15, 2012 – California Institute of Technology, Division of Geological and Planetary Sciences, geology club seminar
Title: *“What can the mid-Tertiary unconformity tell us about deformation and erosion in the Nevadaplano?”*
7. September 24, 2012 - University of Nevada, Reno, Department of Geological Sciences seminar series
Title: *“What can the mid-Tertiary unconformity tell us about deformation and erosion in the Nevadaplano?”*
6. February 2, 2012 – Bhutan Department of Geology and Mines, Thimpu, Bhutan
Title: *“A summary of the work of the Princeton Group, 2007-2011, part 1: stratigraphy, depositional age constraints, and the new geologic map of Bhutan”*
5. November 16, 2011 – University of Nevada, Las Vegas, Geoscience Department seminar series
Title: *“Spatial patterns of internal strain and deformation temperature in the Himalayan fold-thrust belt, Bhutan”*
4. May 2, 2011 – University of Nevada, Reno, Department of Geological Sciences seminar series
Title: *“Spatial patterns of internal strain and deformation temperature in the Himalayan fold-thrust belt, Bhutan: Implications for the development of strain in thrust sheets”*
3. March 9, 2011 – Idaho State University Department of Geosciences colloquium
Title: *“Spatial patterns of internal strain and deformation temperature in the Himalayan fold-thrust belt, Bhutan”*
2. February 28, 2011 – Boise State University Department of Geosciences seminar
Title: *“Spatial patterns of internal strain and deformation temperature in the Himalayan fold-thrust belt, Bhutan”*
1. November 4, 2010 – Nevada Petroleum Society monthly meeting, Reno, NV
Title: *“Constructing the Himalayan fold-thrust belt: a view from Bhutan”*

Conference Abstracts

(asterisk denotes graduate student advisee author; double asterisk denotes undergraduate student advisee author)

119. Markthaler, K., Thompson, J., Kohn, M.J., Shah, S.A., Ionescu, A.*, **Long, S.**, and Schwartz, D., 2024, Moving mountains: determining temperature distribution in the Himalaya’s earliest metamorphic rocks: Geological Society of America Abstracts with Programs (Annual meeting, September, 2024).

Teaching Experience (2002-present): 35 total semesters, 133 total credits

(n = number of students in each course)

Washington State University: rank: Associate Professor

- Spring 2025: SOE 340 – Structural Geology and Plate Tectonics (4 credits)
Fall 2024: No teaching – awarded a WSU College of Arts and Science Research Enhancement Opportunity one-semester course release
Spring 2024: SOE 340 – Structural Geology and Plate Tectonics (4 credits, n = 14)
Fall 2023: SOE 542 – Extensional Tectonics (3 credits; n = 9)
SOE 498/598 – Geology Seminar (1 credit, n = 5)
Spring 2023: SOE 210 – Earth’s History and Evolution (4 credits; n = 78)
Fall 2022: SOE 340 – Structural Geology and Plate Tectonics (4 credits, n = 12)
SOE 498/598 – Geology Seminar (1 credit, n = 7)
Spring 2022: SOE 210 – Earth’s History and Evolution (4 credits; n = 80)
Fall 2021: SOE 340 – Structural Geology and Plate Tectonics (4 credits, n = 22)
SOE 541 – Orogenic Systems (3 credits; n = 8)
Spring 2021: No teaching – sabbatical
Fall 2020: No teaching – sabbatical
Spring 2020: SOE 210 – Earth’s History and Evolution (4 credits; n = 80)
Fall 2019: SOE 340 – Structural Geology and Plate Tectonics (4 credits, n = 31)
SOE 498/598 – Geology Seminar (1 credit, n = 13)
Spring 2019: SOE 210 – Earth’s History and Evolution (4 credits, n = 59)
Fall 2018: SOE 542 – Extensional Tectonics (3 credits; n = 9)
Summer 2018: GEOL 408 – Field Geology (3 credits; n = 6)
Spring 2018: GEOL 340 – Structural Geology (4 credits; n = 15)
Summer 2017: GEOL 408 – Field Geology (3 credits; n = 19)
Spring 2017: GEOL 340 – Structural Geology (4 credits; n = 12)
GEOL 498/598 – Geology Seminar (1 credit; n = 11)
Fall 2016: GEOL 541 – Orogenic Systems (3 credits; n = 9)
Spring 2016: GEOL 340 – Structural Geology (4 credits; n = 8)
Fall 2015: No teaching – semester teaching release awarded upon hiring.

University of Nevada, Reno: rank: Assistant Professor

- Summer 2015: GEOL 451 – Field Camp (6 credits; n = 19) – served as Director
Summer 2014: GEOL 451 – Field Camp (6 credits; n = 23) – served as Director
Summer 2013: GEOL 451 – Field Camp (6 credits; n = 23) – served as Director
Summer 2012: GEOL 451 – Field Camp (3 credits; n = 26) – taught half of course
Spring 2012: GEOL 701A – Balanced Cross-Sections (2 credits; n = 6)
Fall 2011: GEOL 731 – Orogenic Systems (3 credits; n = 11)

Princeton University: rank: Teaching Assistant during Ph.D. program

- Fall 2009: ENV 399 – Environmental Decision Making (1 credit; n = 16)
ENV 499 – Environmental Change, Poverty and Conflict (1 credit; n = 8)
Spring 2009: GEO 210 – Earthquakes, Volcanoes, and Other Hazards laboratory (1 credit, 2 sections; n = 26)
Spring 2008: GEO 210 – Earthquakes, Volcanoes, and Other Hazards laboratory (1 credit, 1 section; n = 17)

Fall 2007: GEO 235 – The Physical Earth laboratory (1 credit, 1 section; n = 14)

Idaho State University: rank: Adjunct Instructor

Spring 2006: GEOL 1101 – Physical Geology (3 credits; n = 79)

GEOL 1100 – Geology and Human Affairs (3 credits; n = 51)

GEOL g4409 – Remote Sensing laboratory (1 credit; n = 21)

Fall 2005: GEOL 1101 – Physical Geology (3 credits; n = 70)

GEOL 1110 – Physical Geology laboratory (1 credit, 2 sections; n = 70)

GEOL g4402 – Geomorphology laboratory (1 credit; n = 24)

Summer 2005: GEOL 1100 – Geology and Human Affairs (3 credits; n = 7)

Idaho State University: rank: Teaching Assistant during M.S. program

Spring 2004: GEOL 1110 – Physical Geology laboratory (1 credit, 1 section; n = 27)

GEOL 4421 – Structural Geology laboratory (1 credit; n = 16)

Spring 2003: GEOL 1110 – Physical Geology laboratory (1 credit, 2 sections; n = 32)

GEOL 4421 – Structural Geology laboratory (1 credit; n = 18)

Fall 2002: GEOL 1110 – Physical Geology laboratory (1 credit, 3 sections; n = 48)

University of Idaho: rank: Teaching Assistant during undergraduate work

Spring 2002: GEOL 101L - Physical Geology laboratory (1 credit, 2 sections; n = 40)

Courses Designed and Taught

Undergraduate level:

Structural Geology and Plate Tectonics (WSU GEOL 340/SOE 340): Over geologic time scales, due to the application of stresses, Earth materials such as rocks deform through a variety of processes, at scales that range from submicroscopic to regional. This course presents a thorough examination of the mechanisms by which Earth materials deform, and the geologic structures that result from this deformation. An understanding of structural geology is fundamental to multiple geologic fields, including exploration for natural resources such as oil, gas, coal, and precious metals, exploration for groundwater and geothermal energy resources, and evaluation and mitigation of natural geologic hazards.

Field geology (WSU GEOL 408/UI GEOL 490/UNR GEOL 451): Through a series of field-based exercises, students will learn new skills and integrate knowledge gained through their previous coursework in order to understand complex geologic field relations in three dimensions. The focus of this course is to master advanced field skills, including note taking, lithologic description, measurement of planar and linear features, structural analysis, and geologic mapping. Students will synthesize real-world data that they collected, in order to generate geologic maps, illustrate the geometries of deformed

rocks using cross-sections, and produce descriptive and interpretive written reports. This course is enhanced by the spectacular geologic setting of the Dillon, MT, region.

Earth's History and Evolution (WSU SOE 210): This course provides an overview of the origins and evolution of Earth and its life-forms over geologic time, by teaching how the science of Geology has been applied to the study of the rock and fossil record. We will cover topics including the origins of the solar system, plate tectonics, and the atmosphere and oceans, as well as an introduction to geologic time, absolute and relative dating methods, principles of stratigraphy, and interpretation of the fossil record. By the end of this course students should have a good understanding of the basics of the scientific process of inquiry, the requirements and limitations of scientific theories, and a full appreciation of the true magnitude of geologic time.

Physical Geology (ISU GEOL 1101): This course addresses several grand challenges of Earth science, including the need to better understand biogeochemical cycles, the rock cycle, climate change, the hydrologic cycle, and renewable and non-renewable resources. One of the main objectives is that students develop a general understanding of the scientific process that will then be used to evaluate human interactions with the natural world. Students will become familiar with many Earth science terms, concepts, and methods, and will be required to perform basic research and simple scientific procedures, including gathering data, organizing information, and communicating what they have learned through written work. This process will enhance critical thinking, logic and communications and discussion skills useful to multiple disciplines.

Graduate level:

Orogenic Systems (WSU GEOL 541/SOE 541, UNR GEOL 731): Orogenic belts are the result of contractional deformation at convergent plate margins, which produces the thickest crust and highest elevations on Earth. Much of this deformation is accommodated through formation of fold-thrust belts, which can accommodate 100's of km of crustal shortening. An understanding of the geometry, kinematics, and dynamics of fold-thrust belts is critical to the study of compressional tectonics. In addition, because fold-thrust belts and associated foreland basin systems host a large percentage of the world's oil, gas, and coal, understanding orogenesis is critical to the hunt for natural resources. The purpose of this class is to gain an understanding of orogenesis by undergoing a semester-long case study on the North American Cordillera. Key to this goal will be a week-long field trip, organized as a transect through the frontal thrust belt in Alberta.

Extensional tectonics (WSU SOE 542): Tectonic extension is accommodated by normal faults and normal-sense shear zones, which work together to thin and elongate the upper and lower crust, respectively. An understanding of the geometry and dynamics of how these structures act to thin the crust is critical to the study of tectonics. Also, because normal faults form primary conduits for fluid flow and mineralization, an understanding of extensional tectonics is fundamental to the hunt for natural resources. In this course,

we will undergo a semester-long case study on the Basin and Range province in Nevada and Utah (includes a week-long field trip), the world's finest active extensional province.

Teaching Evaluations Summary Table

(all metrics are out of a maximum possible value of 5.00)

Term	University	Course	Course title	Instructor overall	Course quality	Explanations/ examples	Available/ approachable	Knowledge/ enthusiasm	n
FA 2011	UNR	GEOL 731	Orogenic Systems	4.83	-	4.50	4.75	-	6
SPR 2013	UNR	GEOL 451	Summer Field Camp	4.25	-	4.25	-	-	20

Graduate Student Mentoring

2023-present: Primary advisor to **Aurora Rosenberger** (WSU Ph.D. student – degree in progress).

2022-present: Primary advisor to **Adelie Ionescu** (WSU Ph.D. student – degree in progress).

2022-present: Primary advisor to **Andrea Richardson** (WSU Ph.D. student – degree in progress).

2020-2022: Co-advisor to **Keita Hasegawa** (WSU M.S. student, completed 2022).
Thesis: Hasegawa, K., 2022, The timing of prograde metamorphism of Greater Himalayan rocks in south-central Bhutan: insights from garnet and monazite geochronology [Master's Thesis]: Pullman, Washington State University, 46 p. 9 figures, 5 tables.

2018-2023: Primary advisor to **Nolan Blackford** (WSU Ph.D. student, completed 2023).
Dissertation: Blackford, N.R., 2023. The evolution of the Nevadaplano from construction to dismemberment: investigations of thermal conditions, strain distribution, and fabric intensity in eastern Nevada and western Utah [Ph.D.

dissertation]: Pullman, Washington State University, 251 pages, 12 tables, 34 figures, 1 plate.

2016-2021: Primary advisor to **Jesslyn Starnes** (WSU Ph.D. student, completed 2021).
Dissertation: Integrating metamorphic and structural datasets to evaluate the thermal, kinematic, and geometric framework of the Himalayan thrust belt in Bhutan [Ph.D. dissertation]: Washington State University, 213 p., 37 figures, 12 tables.

2016-2020: Primary advisor to **Russell Di Fiori** (WSU Ph.D. student, completed 2020).
Dissertation: Investigating the space-time evolution of Cordilleran deformation and deposition in central Nevada: Insights from Early Cretaceous syn-tectonic basins [Ph.D. dissertation]: Washington State University, 251 p., 36 figures, 8 tables, 5 plates.

2015-2018: Co-advisor to **Laura Pianowski** (WSU M.S. student, completed 2018).
Thesis: Pianowski, L.S., 2018, Timing of metamorphism in the Main Central thrust zone in south-central Bhutan: Insights from garnet and monazite geochronology [Master's Thesis]: Pullman, Washington State University, 78 p. 12 figures.

2013-2019: Primary advisor to **Ryan Anderson** (WSU Ph.D. student, completed 2019).
Dissertation: Anderson, R.B., 2019, The geometry, kinematics, and timing of the central Andean thrust belt of southern Bolivia: A field based test of cordilleran cyclicity [Ph.D. dissertation]: Washington State University, 303 p., 42 figures, 16 tables.

2012-2014: Primary advisor to **Melissa Penfold** (UNR M.S. student, completed 2014).
Thesis: Penfold, M.L., 2014, Microstructural analysis of Greater Himalayan rocks in northern Bhutan [Master's Thesis]: Reno, University of Nevada, 93 p., 23 figures.

2012-2014: Primary advisor to **Russell Di Fiori** (UNR M.S. student, completed 2014).
Thesis: Di Fiori, R.V., 2014, Focused geologic mapping and structural analysis of the southern Eureka mining district; assessing structural controls and spatial patterns of mineralization [Master's Thesis]: Reno, University of Nevada, 71 p., 14 figures, 1 plate.

Undergraduate Student Mentoring

2021-2022: Senior research project advisor to **Hadeel Mohamed Masoud Al Harthi** (WSU B.S. 2022).

2020-2023: Sophomore-Junior-Senior thesis advisor to **Julia Stevens** (WSU B.S. 2023)
Thesis: Ductile strain in the footwall of the Schell Creek Range detachment system, eastern Nevada, USA: implications for pre-extensional geometry [Senior thesis]: Pullman, Washington State University, 16 p., 6 figs.

**Winner of the 2023 WSU Emeritus/Undergraduate Research Award in the Physics and Math category*

- 2020-2021: Senior thesis advisor to **Dominik Vlaha** (WSU B.S. 2021).
Thesis: Using quartz fabric intensity and kinematic vorticity to characterize the style and distribution of shearing on the Main Central Thrust in western Bhutan [Senior thesis]: Pullman, Washington State University, 13 p., 6 figs., 1 table.
- 2019-2020: Senior research project advisor to **Spencer McNamara** (WSU B.S. 2020).
- 2019-2020: Senior thesis advisor to **Austyn Gentry** (WSU B.S. 2020)
Thesis: Geometry of Eocene detachment faults and half-grabens of the Okanagan and Kettle Domes, northeastern Washington: Insights from regional cross sections [Senior thesis]: Pullman, Washington State University, 18 p., 3 figs., 1 table.
- 2019: Summer research experience advisor to **Quinn Zunino** (WSU B.S. 2021)
- 2018-2019: Senior research project advisor to **Evon Branton** (WSU B.S. 2019)
- 2017-2019: Honors College senior thesis advisor to **Kimberly Kramer** (WSU B.S. 2019). Thesis: Determining the peak geothermal field gradients of the Fish Creek Range, Nevada, U.S.A. [Senior thesis]: Pullman, Washington State University, 30 p., 11 figs.
- 2017-2018: Senior research project advisor to **Connor Mullady** (WSU B.S. 2018).
- 2016-2017: Senior thesis advisor to **Austin Stout** (WSU B.S. 2017).
Thesis: Extensional strain, contractional strain, and peak thermal conditions in the White Pine Range, eastern Nevada: insights from a structural reconstruction integrated with RSCM thermometry [Senior thesis]: Pullman, Washington State University, 19 p., 5 figs.
- 2009: Mentor for **Chris Hepburn** (Princeton University B.S. 2010) Junior Independent Work Paper: "The internal strain and deformation of Bhutan"
- 2008: Mentor for **Natasha Lavdovsky** (Princeton University B.S. 2009) Junior Independent Work Paper: "Finite strain in the Pennsylvania Appalachians"

Awards

- 2013 – Charles J. Mankin Memorial Award, for co-authorship on Geologic Map of Idaho
2010 – Arnold Guyot Teaching Award, Princeton University
2000 – NASA Space Grant for Idaho scholarship, The College of Idaho
2000 – Glenn D. Weed Memorial Scholarship, The College of Idaho
1999 – Ralph and Merle Kyle Mathematics Scholarship, The College of Idaho

Professional Societies

- Geological Society of America (GSA): 2004-present
American Geophysical Union (AGU): 2006-present

Nevada Petroleum and Geothermal Society (NPGS): 2011-2015
Geological Society of Nevada (GSN): 2011-2015
American Association of Petroleum Geologists (AAPG): 2001

Professional Service

Journal editing:

2016-2020: **Associate Editor**, American Geophysical Union journal *Tectonics* (handled 42 total papers).

Department-level committees:

2023-present: WSU Earth Sciences program lead (chair)
2023-present: Faculty mentoring committee for Scott Jess (chair)
2023-present: WSU School of the Environment graduate studies committee
2022-2023: WSU School of the Environment awards committee
2022-present: Faculty mentoring committee for Johannes Haemmerli
2022-2023: WSU School of the Environment Earth surface processes faculty search committee (chair)
2021-2022: WSU School of the Environment Earth surface processes faculty search committee (chair)
2019-2020: WSU School of the Environment plant ecophysiology faculty search committee
2019-2020: WSU School of the Environment graduate studies committee
2018-2019: WSU School of the Environment vision and strategy committee
2018: WSU School of the Environment microprobe technician search committee
2018-2019: WSU School of the Environment geology revitalization committee (chair)
2017-2018: WSU School of the Environment geology revitalization committee (chair)
2016-2017: WSU School of the Environment geology revitalization committee
2015-2016: WSU School of the Environment undergraduate studies committee
2015: UNR NBMG neotectonic geologist faculty search committee
2014: UNR NBMG economic geologist faculty search committee
2013: UNR NBMG personnel committee
2012-2013: UNR Department of Geological Sciences and Engineering geological engineering faculty search committee (2 positions)
2012: UNR NBMG personnel committee
2011-2012: UNR Department of Geological Sciences and Engineering geological engineering faculty position search committee

University-level committees:

2013-2014: UNR College of Science instrumentation committee

Other committees/service:

2021: Earth Sciences Proposal Review Panel member for NSF Tectonics Program
2018-present: Washington Geological Survey STATEMAP advisory committee
2017-2019: Registered Student Organization faculty advisor, WSU Geology Club
2016-present: Idaho Geological Survey geological mapping advisory committee

Graduate student committees:

2024-present: Shane Scoggin (WSU Ph.D.) – degree in progress
2024-present: Brianna Dowler (WSU M.S.) – degree in progress
2024-present: Sajjad Shad (Boise State University Ph.D.) – degree in progress
2023-present: Elizabeth Urban (WSU M.S.) – degree in progress
2023-present: Hadeel Mohamed Masoud Al Harthi (WSU M.S.) – degree in progress
2023-present: Cole McGregor (WSU M.S.) – degree in progress
2022-present: Lily Wallenbrock (WSU M.S.) – degree in progress
2021-present: Evan Soderberg (WSU Ph.D.) – degree in progress
2021-2023: Alexis Richardson (WSU M.S.)
2020-2022: Jonathan Stanfield (WSU M.S.)
2020-present: Payton McCain (Texas A&M Ph.D.) – degree in progress
2020-2024: Jarred Zimmerman (WSU Ph.D.)
2019-2021: Shannon Conner (WSU M.S.)
2019-2021: Claire Puleio (WSU M.S.)
2018-2023: Ross Salerno (WSU Ph.D.)
2017-2019: Chris Brown (WSU Ph.D.)
2017: Shaina Cohen (Boise State University Ph.D.)
2017: Gilbert Ching (WSU M.S.)
2016-2022: Austin Green (WSU Ph.D.)
2016-2018: Da Wang (WSU Ph.D.)
2016-2019: Clay McDonie (WSU M.S.)
2016-2019: Andrew Canada (University of Idaho Ph.D.)
2016: Daniel Gurganus (WSU M.S.)
2016-2017: Somiddho Bosu (University of Alabama M.S.)
2016-2017: Alex Johnson (WSU M.S.)
2014-2016: Carolina Zamora (UNR M.S.)
2014-2016: Jesse Walters (Boise State University M.S.)
2012-2015: Gwen Linde (UNR Ph.D.)
2012-2014: Kenjo Agustsson (UNR M.S.)
2012-2014: Kate Zeiger (UNR M.S.)
2012-2013: Kyle Gray (UNR M.S.)
2011-2014: Jack Rigsbee (UNR M.S.)
2010-2012: Jonathan Payne (UNR M.S.).

Conference session chairing:

2021: Co-convenor of “Tectonic, Topographic, and Exhumation History of the Himalaya-Tibetan Orogen” session at the American Geophysical Union annual meeting, New Orleans, LA
2015: Co-chair of “Regional Geology” session at the Geological Society of Nevada Symposium, Reno, NV
2014: Co-chair of “Mesozoic Paleogeography of the North American Cordillera” session at the Joint Rocky Mountain/Cordilleran Geological Society of America meeting, Bozeman, MT

Media outreach:

- 2023: Interviewed as geologist for WSU 'Ask Dr. Universe': "How did our planet get oxygen?" <https://askdruniverse.wsu.edu/2023/04/27/how-did-our-planet-get-oxygen/>
- 2020: Interviewed by KREM-2 News in Spokane about March 31 M6.5 Idaho earthquake <https://www.youtube.com/watch?v=zUSkeK4U6Zc>
- 2019: Interviewed as geologist for WSU 'Ask Dr. Universe': "How do earthquakes happen?" <https://askdruniverse.wsu.edu/2018/12/21/how-do-earthquakes-happen/>

Journal article reviews (68 total between 2011-present): Earth-Science Reviews, Geology, Earth and Planetary Science Letters, GSA Bulletin, Tectonics, G-Cubed, Journal of Structural Geology, Geosphere, Paleogeography-Paleoclimatology-Paleoecology, Journal of Geophysical Research, Journal of Petrology, Minerals, Gondwana Research, Precambrian Research, AAPG Bulletin, International Journal of Earth Sciences, Canadian Journal of Earth Sciences, Island Arc, GSA Field Trip Guides, Terra Nova, Rocky Mountain Geology, The Journal of Maps, Geological Society of Nevada

Proposal reviews (23 total between 2011-present): NSF Tectonics, NSF Geophysics, NSF Frontiers, NSF Postdoctoral Fellowships, ACS-Petroleum Research Fund, ACS-PRF New Directions, Graduate Women in Science, Chilean National Science and Technology Commission FONDEYCT

Field Work

October, 2023 (1 week):	Northern Snake Range, eastern Nevada
August, 2023 (3 weeks):	Ladakh, northwestern Indian Himalaya
May-June, 2023 (1 week):	Salmon River Suture Zone, western Idaho
August, 2021 (1 week):	Salmon River Suture Zone, western Idaho
June, 2021 (1 week):	Northern Snake Range, eastern Nevada
October, 2020 (1 week):	Salmon River Suture Zone, western Idaho
September, 2020 (2 weeks):	Northern Snake and Schell Creek Ranges, eastern Nevada
June, 2019 (1 week):	Northern Snake Range, eastern Nevada
July-Aug, 2018 (3 weeks):	Ladakh, northwestern Indian Himalaya
March-Aug, 2017 (1 week):	Salmon River Suture Zone, western Idaho
Aug., 2017 (1 week):	Diamond, Fish Ck., and Pancake Ranges, eastern Nevada
Oct., 2016 (3 weeks):	Eastern Himalaya, Bhutan
July, 2016 (1 week):	Diamond and Fish Creek Ranges, eastern Nevada
Oct., 2014 (3 weeks):	Eastern Himalaya, Bhutan
Sept.-Nov., 2013 (5 weeks)	Grant Range, eastern Nevada
July-Aug., 2013 (3 weeks)	Central Andes, Bolivia
Feb.-Mar., 2013 (4 weeks)	Eastern Himalaya, Bhutan
May-Sept., 2012 (5 weeks)	Diamond and Fish Creek Ranges, eastern Nevada
Feb.-Mar., 2012 (5 weeks)	Eastern Himalaya, Bhutan
June-Aug., 2011 (9 weeks)	Diamond and Fish Creek Ranges, eastern Nevada
Oct., 2010 (1 week)	Diamond and Fish Creek Ranges, eastern Nevada
April-May, 2010 (9 weeks)	Eastern Himalaya, Bhutan

Sept.-Nov., 2008 (13 weeks)	Eastern Himalaya, Bhutan
Aug., 2007 (3 weeks)	Gardner Canal, British Columbia Coast Range
April-June, 2007 (12 weeks)	Eastern Himalaya, Bhutan
July-Aug., 2006 (4 weeks)	Sacramento Mountains, southern New Mexico
June, 2006 (3 weeks)	Central Andes, Bolivia
Sept.-Oct., 2005 (2 weeks)	Bannock Range, southeast Idaho
June-Oct., 2003 (9 weeks)	Malad Range, southeast Idaho
